<sup>1</sup>The RELATIVE CITATION RATIO (RCR) is a field- and time-normalized citation metric (Hutchins et al., 2016, *PLoS Biology*). NIH-funded papers are the benchmark for RCR: Any paper with RCR = 1.0 has an RCR higher than 50% of NIH-funded papers. Recent papers and papers that are not indexed on PubMed will not have an RCR. All RCR values were extracted from the *iCite* database using [PythonTfX](#) on October 23, 2023.
